Skills

MongoDB

Express

React

Node.js

C

Git

HTML & CSS

SQL

Python

JavaScript

Hobbies

Music

Drumming

Game Development

Dancing

🔧 Courses

CS50, Harvard

December 2023 — February 2023

★ Projects

Portfolio website

2023

Used vanilla Javascript, HTML and CSS to set up a static website, deployed with Github Pages.

Full-Stack Workout tracker

2023

Used the MERN stack to create a workout tracker. I set up a database to store the workouts as well as an API to communicate with said database, rendering everything in the front-end with React.

Wordle-like Web Browser game using IGDB database

Present

In the early stages of development making a game similar to Wordle. The end user is given a blurred image of a game pulled from the International Games Database as well as other information and they have to guess to fill it in. This will be created with the MERN stack to get even more comfortable with technology that is popular in the field.
